Solutions For All Metering & Measurement Processes

## Chemical Dosing Tanks

Containment Bunds  
Fabricated Enclosures

## Chemical Dosing Tanks & Bunds

### Dosing Tanks:-

Specially designed for various water treatment applications suitable for storing an extensive range of chemicals, manufactured in U.V. stabilized linear M.D.P.E gives the one-piece moulding smooth internal and external surfaces. All tanks come complete with screw caps for safety

Split-level top design gives extra strength and provides an area for mounting equipment e.g. agitators or pumps etc.

### Chemical Bunds:-

Range of purpose moulded protection bunds available to take 110% of the relevant dosing tank capacity; bunds are designed to be stackable for efficient transportation and storage.

### Dosing Tank-Bunds Specifications

Tank Size	Dimensions	Bund Size	Dimensions
50 Litre	425 x 500 mm (16¾ x 19¾)	35 Litre	370 x 300 mm (14½ x 12)
100 Litre	495 x 700 mm (19½ x 27¾)	50 Litre	805 x 325 mm (31¾ x 12¾)
200 Litre	635 x 785 mm (25" x 31")	100 Litre	970 x 395 mm (38¾ x 15½)
300 Litre	660 x 1075 mm (26" x 42¾)	200 Litre	1130 x 680 mm (44½ x 26¾)
500 Litre	815 x 1100 mm (32¾ x 43¾)	500 Litre	1825 x 560 mm (71¾ x 22¾)
1000 Litre	1065 x 1355 mm (41¾ x 53¾)	1000 Litre	680 x 285 mm (26¾ x 11¼)

**Note: - Black Dosing Tanks Available On Request**

## Static Moulded Tanks

### Static Tanks:-

Static storage are designed for bulk storage of a wide variety of chemical & water treatment applications, manufactured from medium density uv stabilized linear polyethylene gives the one-piece moulding smooth internal and external surfaces for durability and practical usage with screw-fit lids for safety and access.

Flat top surface design gives extra strength and provides an area for mounting equipment such as electrical agitators-dosing pumps etc.

Tank Capacity	Dimensions	Weight
1500 Litres	1200 x 1694 mm (47 x 63)	50 Kg
2000 Litres	1625 x 1430 mm (64 x 56)	75 Kg

**Note: - Fabricated Bunds Available On Request**

None-Potable Water Tanks 1300-10,000 Litres Capacity

## Potable Water Tanks

### Potable Tanks:-

Moulded WRAS approved black medium density polyethylene UV stabilized for protection from sunlight plus being tough and durable, fitted with 16" hinged manhole cover to allow access for installation of ballcocks, floats and additional outlets. All tanks are fitted with 2" BSP male outlet for connection on to copper, pex, hydrocare etc.

**NOTE: - All potable water tanks require a solid base for installation**

Tank Capacity	Dimensions	Connections
1300 Litres	1210 x 1415 mm (47 x 55)	2" BSP
2500 Litres	1625 x 1430 mm (64 x 56)	2" BSP
3600 Litres	1885 x 1855 mm (74 x 73)	2" BSP
5000 Litres	2035 x 2265 mm (80 x 89)	2" BSP
10,000 Litres	2630 x 2500 mm (104 x 98)	2" BSP

**Note: - Other Outlet Sizes Available On Request**

## Fabricated Enclosure Kiosks

### Fabricated Enclosures

Bespoke secure enclosures designed for housing of dosing systems together with chemical dosing tanks with integral bunds, provide a practical solution for a wide variety of applications, enclosures can be designed around the specific requirements needed to house both the equipment-pipework and tanks to ensure installation onsite is completed with the minimum of inconvenience to the customer.

**Construction: - Polypropylene with hinged doors.**

## Freestanding Dosing Systems

### Freestanding Systems

Bespoke designed freestanding dosing systems with chemical dosing tanks including integral bund, provide a practical solution when all the equipment needs to be contained together for a wide variety of applications, enclosures can be designed around the specific requirements needed to house both the equipment-pipework and tanks to ensure installation onsite is completed with the minimum of inconvenience to the customer.

**Construction: - Polypropylene with protection bund.**
